ANDERSON OLIVEIRA

concluiu com sucesso a Especialização on-line

Cybersecurity Fundamentals

Holders of this Specialization Certificate showcased their basic knowledge of cybersecurity concepts. The program equipped learners with cybersecurity fundamentals skills, cybersecurity architecture basics, and awareness of cybersecurity career options. The certificate holder also developed practical experience with hands-on cybersecurity activities such as password management and security best practices, security threat identification, browser security and privacy setting management, and secure network creation. They also demonstrated their ability to create a resume and portfolio, and search for relevant job postings.
