ANDERSON ROCHA DE OLIVEIRA

Junior IT Support Analyst | Cybersecurity | Python Automation | SOC | Geospatial Technology

Brazil | +55 22 99608-1546 | anderson2496@outlook.com

PROFESSIONAL SUMMARY

Computer Science undergraduate transitioning into information technology, with extensive experience in critical industrial environments, technical leadership, troubleshooting, and operational support. Hands-on knowledge of Windows and Linux, hardware and operating systems, networking fundamentals, cybersecurity, SIEM/Splunk, Python automation, technical documentation, and user training. Brings strong discipline, root-cause analysis, communication, and incident-resolution skills developed in high-responsibility industrial and offshore operations. Target roles include L1 IT Support, Service Desk, NOC, Junior SOC, and Technical Support.

CORE SKILLS

- IT support and technical troubleshooting
- Windows and Linux fundamentals
- Hardware and operating systems
- Computer networking fundamentals
- SIEM / Splunk and log analysis
- Cybersecurity, SOC and Blue Team concepts
- Python scripting and workflow automation
- Git, GitHub and Visual Studio Code
- MongoDB, JavaScript, HTML and CSS fundamentals
- Google Earth Engine and geospatial analysis
- Technical documentation and user training
- Industrial automation, sensors and instrumentation

SELECTED IT PROJECTS AND ACCOMPLISHMENTS

- Developed a Python-based system to automate industrial inspection reports by integrating spreadsheets, classified photographs, technical measurements, JSON data, image processing, and PDF generation.
- Built hands-on cybersecurity and IT support labs using Windows, Linux, Splunk, virtual machines, Git, and GitHub to practise troubleshooting, security monitoring, and log analysis.
- Created scripts for data processing, repetitive workflow automation, technical documentation, and geospatial analysis with Python and Google Earth Engine.
- Completed structured professional learning paths in IT support, cybersecurity, SIEM, threat hunting, DevOps, Agile practices, hardware, and operating systems.

PROFESSIONAL EXPERIENCE

Assembly and Operations Supervisor - Water and Wastewater Treatment Systems | *JLP Empreendimentos Rurais Ltda.* **Current**

Minas Gerais, Brazil

- Supervise operational activities and coordinate the integration of electrical, automation, and instrumentation systems.
- Support system start-up, testing, commissioning, and operation, including troubleshooting sensors, control panels, and automated equipment.
- Prepare technical records, coordinate teams, and resolve operational issues in safety-critical environments.

Multidisciplinary Offshore Supervisor / IRATA Level 3 | *KAEFER RIP Serviços Industriais* **Previous role**

Brazil

- Coordinated multidisciplinary technical teams in critical offshore environments and continuous operations.
- Planned field activities and resolved technical problems involving electrical maintenance, instrumentation, and industrial integrity.
- Applied risk assessment, clear communication, procedural compliance, and incident-response discipline under demanding conditions.

Computer Literacy Instructor | *PROJOVEM Brasil* **Previous role**

Brazil

- Taught basic computer skills, internet use, and digital inclusion to learners with different levels of technical familiarity.
- Provided user guidance, practical troubleshooting, and clear step-by-step technical instruction.

EDUCATION

Bachelor of Computer Science - In progress
Bachelor of Agronomy - In progress
Technical Diploma in Mechatronics - Completed
Technical Diploma in Electrotechnics - Completed
Industrial Instrumentation - In progress

IT CERTIFICATIONS AND TRAINING

- IBM IT Support: Technical Support, Hardware and Operating Systems, Operating System Administration and Security, Case Studies and Capstone, and Career Preparation
- IBM Cybersecurity: Cybersecurity Fundamentals, Encryption and Cryptography, Network Security, Security Compliance, Penetration Testing, Threat Hunting, and Cryptography
- Google Cybersecurity: Foundations of Cybersecurity; Play It Safe: Manage Security Risks
- Splunk: Introduction to SIEM, Splunk Query Language and Data Analysis, and Splunk Administration and Advanced Topics
- Cyber Threat Hunting - Infosec
- IBM Development and Operations: Introduction to Software, Programming and Databases; Agile Development and Scrum; Introduction to DevOps
- MongoDB and the Document Model - MongoDB
- Google Earth Engine, Python for Geospatial Analysis, Remote Sensing, and Applied Geoprocessing

ADDITIONAL TECHNICAL BACKGROUND

Electrical systems, industrial automation, instrumentation, equipment inspection, offshore operations, technical team supervision, AutoCAD, SolidWorks, and Arduino.
